Programming in Go - pearsoncmg.com

Creating Web Applications with Go. It assumes that the user has a basic understanding of the language, but not much more. Over the span of the course, aspects of a complete web application are built with an eye on practical application of the language. Additionally, the course will be focused on the core Go libraries, as opposed to plug-ins.

Creating Web Applications with Go | Pluralsight

It will also be useful to students who have had a reasonable amount of programming experience. Go provides high level features such as slices (in effect variable length arrays) and maps (hash tables). Go can be used for procedural and object-oriented programming (or a combination of both).

Programming in Go — book - Qtrac

Since Go is first open sourced in 2009, it is rapidly growing in popularity and is especially suited to creating web applications due to its focus on simplicity and its rich standard library. In this course, we're going to learn how to use Go to create a full featured web application following the model, view controller design pattern.

Creating Web Applications with Go | Pluralsight

With this guide, pioneering Go programmer Mark Summerfield shows how to write code that takes full advantage of Go's breakthrough features and idioms. Both a tutorial and a language reference, Programming in Go brings together all the knowledge you need to evaluate Go, think in Go, and write high-performance software with Go.

Programming in Go: Creating Applications for the 21st ...

Go (programming language) Go is a statically typed, compiled language in the tradition of C, with memory safety, garbage collection, structural typing, and CSP -style concurrency. The compiler, tools, and source code are all free and open source.

Go (programming language) - Wikipedia

What is the Go Programming Language? The relatively new Go programming language sits neatly in the middle of the landscape, providing lots of good features and deliberately omitting many bad ones. It compiles fast, runs fast-ish, includes a runtime and garbage collection, has a simple static type system and dynamic interfaces, and an excellent standard library.
