answers) a. Real or Virtual? b. Upright or Inverted? c. Enlarged or Reduced? 5. Extra Credit: The following represents a system of two lenses, the first a convex lens with focal length $f_1 = 30$ mm, and the second a concave lens with focal length $f_2 = -60$ mm. Use ray tracing to determine the position of the final image, given the object position.

Name Box # Score Date AP Physics - Worksheet #14: Chapter 24

A ray diagram is a diagram that traces the path that light takes in order for a person to view a point on the image of an object. On the diagram, rays (lines with arrows) are drawn for the incident ray and the reflected ray. Complex objects such as people are often represented by stick figures or arrows. In such cases it is customary to draw ...
