Reconstructing a Fossil Lab. Materials: Paper for copying fossils, and additional blank paper for attaching the fossils. Scissors; Tape; Activity: This is an adaptation of a laboratory activity from Prentice Hall. I adapted it to include two different types of fossils, a pterosaur and Deinonychus. This lab would work as part of an evolution activity, but can also be introduced as part of classification.

Reconstructing a Fossil Pterosaur. Background: Imagine looking up to see a fur-covered creature gliding through the air on wings longer than the wings of a small airplane. This creature, a pteranodon (tə ran'ə don'), might have been a common sight during the Cretaceous, soaring from cliffs on its graceful sail like wings.

(Withdraw 3 more bones from the envelope. Use the next 3-5 minutes to incorporate your new finds in your fossil reconstruction.) It's getting late, and you are getting weary. Maybe tomorrow you will find the answer to the puzzle. (Be sure to record on your worksheet your latest suspicion of the type of animal suspected.) C. The next day is cold.

The Mystery Fossil Bones Activity This was one of my favorites. I often used this as a culminating activity for my Geo. History Unit. Students from 9th - 12th loved it. And I'm sure middle school students would, too! I've seen it all over the Internet and had a copy 20 years ago so I have no idea

who the actual image of the bones belongs to.

### **Activity Three: The Mystery Fossil Bones Activity**

Pterosaur Reconstruction Introduction: A common sight during the Cretaceous period was the soaring through the air of a large fur-covered creature called the pterosaur. Pterosaur means flying lizard. Wings of some pterosaurs were longer than the wings of a small plane. This creature lived on cliffs at the edge of lagoons and would ...
