Thanks all!" If the Earth were concave then the laser light would appear higher above the horizon the farther away it is." It sounds like you are actually confirming what concave advocates claim-'the laser light would appear higher above the horizon in a concave Earth.'

Earth curvature refraction experiments - debunking flat ...

An eye examination is a series of tests performed by an ophthalmologist (medical doctor), optometrist, or orthoptist, optician (UK), assessing vision and ability to focus on and discern objects, as well as other tests and examinations pertaining to the eyes. Health care professionals often recommend that all people should have periodic and thorough eye examinations as part of routine primary ...

Eye examination - Wikipedia

An optical fiber is a flexible, transparent fiber made by drawing glass or plastic to a diameter slightly thicker than that of a human hair. Optical fibers are used most often as a means to transmit light between the two ends of the fiber and find wide usage in fiber-optic communications, where they permit transmission over longer distances and at higher bandwidths (data rates) than electrical ...
