Engineering Economics . The essential idea behind engineering economics is that money generates money. You cannot compare \$10.00 today to \$10.00 a year from now without adjusting for the investment potential. A simple example would be to take the \$10.00 and put it in a savings account at 2% interests. After a year you have \$10.20 instead of \$10.00.

Engineering Economics - Louisiana Tech University

The cost of designing, producing, or using an engineering structure or device is an extremely important engineering variable and should be quantitatively treated just as carefully as strength, rigidity, output, or efficiency. Many engineering economics problems involve the choice, based upon cost, between two or more alternative solutions.
