3 Of all the major religious groups in the U.S., white evangelical Protestants are the most likely to reject evolution. Nearly two-thirds (64%) of white evangelicals say that humans and other living things have always existed in their present form, while roughly one-in-ten white evangelicals (8%) say that humans evolved through natural processes.

5 facts about evolution and religion | Pew Research Center

Why do humans need religion and/or possess a spiritual hunger? What use is it in evolution? Why would an accidental process of mutation need us to believe in a living and all knowing designer? Every civilization no matter how isolated has religion. Spiritual hunger seems to be implanted in humans and for a seemingly logical reason - God exists.

Why does human evolution NEED religion? | Yahoo Answers

Human Evolution: Religious Perspectives. Despite strong public interest in the science, however, many people find this topic troubling when viewed from a religious perspective. Representatives of diverse religious communities encourage a larger, more respectful understanding of both the scientific evidence and religious belief.

Human Evolution: Religious Perspectives - Human Evolution by The Smithsonian Institution's Human Origins Program

A scientist's new theory: Religion was key to humans' social evolution. An adult male marmoset carries the offspring he fathered on his back at the Bronx Zoo in New York. Marmosets are among the world's smallest primates, with their heads slightly larger than the size of a quarter.

A scientist's new theory: Religion was key to humans' social evolution - The Washington Post - Washington Post: Breaking News, World, US, DC News & Analysis - The Washington Post

It provides a brief introduction to issues that arise at the crossroads of science and religion,

particularly in relation to the scientific accounts of evolution and human origins that are presented in the exhibit. The primer is organized around two broad topics: science and religion and evolution and creationism.

Science, Religion, Evolution and Creationism: Primer | The Smithsonian Institution's Human Origins Program

Religion in Human Evolution is a work of extraordinary ambition—a wide-ranging, nuanced probing of our biological past to discover the kinds of lives that human beings have most often imagined were worth living. It offers what is frequently seen as a forbidden theory of the origin of religion that goes deep into evolution, especially but not exclusively cultural evolution.
