Chapter 15 River System. A fan-shaped mass of rock material deposited by a stream when the slope of the land decreases sharply; for example, they form when streams flow from mountains to flat land.

### **Chapter 15 River System Flashcards | Quizlet**

Full Answer. This is an example of a river system. From an environmental standpoint, river systems are ecosystems that can suffer negative effects on things such as water quality and plant and animal life health if just one part of the system is polluted or damaged. For example, if a river's source suffers from a high level...
