### CHAPTER 18 REVIEW Chemical Equilibrium

Chemical equilibrium deals with to what extent a chemical reaction proceeds. It is observed that, in most of the chemical reactions, the reactants are not completely converted to products. The reaction proceeds to certain extent and reaches a state at which the concentrations of both reactants and products remain constant with time.

### CHEMICAL EQUILIBRIUM: INTRODUCTION | ADICHEMISTRY

Many chemical reactions are reversible, and the forward and backward reactions can occur at the same time. When the rate of the forward reaction is equal to the rate of the backward reaction, we call that a dynamic equilibrium. We will learn how equilibrium can be described by the equilibrium constant K, and how different factors than can affect the chemical equilibrium.
