The American College of Radiology has defined four safety zones within MRI facilities. These are denoted Zones I through IV and correspond to levels of increasing magnetic field exposure (and hence potential safety concern).

ACR safety zones - Questions and Answers in MRI

Types of probability samples: Many strategies can be used to create a probability sample. Each starts with a sampling frame, which can be thought of as a list of all elements in the population of interest (e.g., names of individuals, telephone numbers, house addresses, census tracts). The sampling frame operationally defines the target population from which the sample is drawn and to which the ...

Questions about Quadrats Interdependence is one of the five key science ideas at KS3. Whilst this can be taught theoretically, some practical fieldwork greatly enhances pupils' understanding.

Questions about Quadrats - Science and Plants for Schools

Sociological theory vs. social theory. Kenneth Allan proposed the distinction between sociological theory and social theory. In Allan's usage, sociological theory consists of abstract and testable propositions about society. It often heavily relies on the scientific method, which aims for objectivity, and attempts to avoid passing value judgments. In contrast, social theory, according to Allan ...
