The solutions steps in the book and the material covered and stressed in your book maybe different, as it was for me. So, the bottom line is that these books could help, but so far not ...

Schaum's Outline of Differential Equations, 4th Edition ...

The general solution of a differential equation is the set of all solutions. Example 1.6: The general solution to the differential equation in Example 1.4 can be shown to be (see Chapters Four and Five) $y = c_1 \sin 2x + c_2 \cos 2x$. That is, every particular solution of the differential equation has this general form.
