Overview. Standard cost accounting uses ratios called efficiencies that compare the labor and materials actually used to produce a good with those that the same goods would have required under "standard" conditions. As long as actual and standard conditions are similar, few problems arise. Unfortunately, standard cost accounting methods developed about 100 years ago, when labor comprised the ...

Value engineering (VE) is a systematic method to improve the "value" of goods or products and services by using an examination of function. Value, as defined, is the ratio of function to cost. Value can therefore be manipulated by either improving the function or reducing the cost. It is a primary tenet of value engineering that basic functions be preserved and not be reduced as a consequence of ...

Joe Dunbar said.... Hi Joe-My name is Trace, and I'm a chef at a small restaurant in Seattle. I've been reading your stuff for a while on restaurantnewsresource.com, and I had a question about one of your comments. You say, "If you have a 35% food cost percentage, you may see the entrees coming in at 40%. The reason the entrees run higher than the food cost percentage is the beverages typically ...
