Reinforcement Activity 1 Part B

Motivation is the reason for people's actions, willingness and goals. Motivation is derived from the word motive in the English language which is defined as a need that requires satisfaction. These needs could also be wants or desires that are acquired through influence of culture, society, lifestyle, etc. or generally innate. Motivation is one's direction to behaviour, or what causes a person ...

Operant conditioning is a theory of learning in behavioral psychology which emphasises the role of reinforcement in conditioning. It emphasises the effect that rewards and punishments for specific behaviors can have on a person's future actions. The theory was developed by the American psychologist B. F. Skinner following experiments beginning in the 1930s, which involved the use of an ...

Self-control, an aspect of inhibitory control, is the ability to regulate one's emotions, thoughts, and behavior in the face of temptations and impulses. As an executive function, self-control is a cognitive process that is necessary for regulating one's behavior in order to achieve specific goals.. A related concept in psychology is emotional self-regulation.
