Chapter 5: Developing Through the Life Span - Psychology 140 with Hester at Western Carolina University - STUDYBLUE

Developmental psychology is the scientific study of how and why human beings change over the course of their life. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life.

Developmental psychology - Wikipedia

In order to define lifespan development psychology we must understand the different context by which it is characterised. Lifespan perspective is characterized by an emphasis on plasticity, interdisciplinary research and a multi-contextual view of the nature of development (Boyd & Bee, 2009). These are the main points of life span development.
