Bayesian inference is a method of statistical inference in which Bayes' theorem is used to update the probability for a hypothesis as more evidence or information becomes available. Bayesian inference is an important technique in statistics, and especially in mathematical statistics. Bayesian updating is particularly important in the dynamic analysis of a sequence of data.

Bayesian inference - Wikipedia

If you want more data on life support than you know what to do with, try reading this NASA document. Otherwise, read on. For some great notes on spacecraft life support, read Rick Robinson's Rocketpunk Manifesto essay.. As a very rough general rule: one human will need an amount of mass/volume equal to his berthing space for three months of consumables (water, air, food).

Life Support - Atomic Rockets - projectrho.com

The littoral zone or nearshore is the part of a sea, lake or river which is close to the shore. In coastal environments the littoral zone extends from the high water mark, which is rarely inundated, to shoreline areas that are permanently submerged. It always includes this intertidal zone and is often used to mean the same as the intertidal zone. However, the meaning of "littoral zone" can ...
