Waves Study Guide Major topics on the test will include: A. The Nature of Waves a. Transfer of Energy b. Mechanical c. Transverse d. Compressional B. Wave Properties a. Crests and Troughs b. Compressions and Rarefactions c. Wavelength, Frequency, Period, and Amplitude d. Velocity = Frequency x Wavelength C. Behavior of Waves a. Reflection b ...

Physical Science Packet Chapter 10: Waves - Stephen Roe

Chapter: Waves Table of Contents Section 3: The Behavior of Waves Section 1: The Nature of Waves ... The answer is A. Electromagnetic waves are ... Wave Properties • Sound waves usually travel faster in a material if the temperature of the material is increased.

Chapter: Waves - Hanover Area School District

The physical properties of a mineral can be seen or measured in some way. 2. The physical properties of a mineral make it possible to identify the mineral. 3. Any mineral can be identified by a careful check of one physical characteristic. 4. Hardness is a measure of how easily a mineral can be located. 5.

Study Guide and Reinforcement - Home - Warren County ...

Directions: Answer the following questions on the lines provided. 10. Why is it important for a scientist to write down every observation, including unexpected observations? 11. How is evaluating an advertising claim a use of the scientific process? 12. Does an advertiser's claim that its results have been verified by an independent laboratory

Study Guide and Reinforcement - Student Edition

A wave's amplitude is the wavelength trough distance from the middle level of a wave to the crest or to the trough. The amplitude shows the amount of energy the wave carries. The more energy a wave has, the greater the amplitude. The number of waves that pass a point in a second is called frequency.
