We consider the electric field produced by a charged ring and develop analytical expressions for the electric field based on intuition developed from numerical experiments. Our solution involves the approximation of elliptic integrals. Problems are suggested for an arbitrarily charged ring.

Off-axis electric field of a ring of charge: American ...

A numerical method is developed for calculating the magnetic field within a rectangular conductor of finite cross section. The analysis begins with the equation of the law of Biot and Savart, which is a triple-integral expression. Two of the integrations in this expression can be evaluated analytically, which will yield a single integration that must be evaluated numerically.
