Lab #16 - Properties of Buffer Solutions. A buffer composed of an equal number of moles of a weak acid and its conjugate base is sometimes called an ideal buffer because it is equally effective in resisting pH changes upon addition of either acid or base. As shown in the example above, in an ideal buffer solution the [H3O+]...

Transcript of Properties of Buffer Solutions. A buffer protects against rapid changes in pH when acids or bases are added. Every living cell is buffered to maintain constant pH and proper cell function. Consumer products are often buffered to become safe to use in human care. The conduction of this lab is also to investigate how buffers are...

One of the more important properties of an aqueous solution is its concentration of hydrogen ion. The H+ or H. 3O. + ion has great effect on the solubility of many inorganic and organic species, on the nature of complex metallic cations found in solutions, and on the rates of many chemical reactions.
